Ms. McGlone is a Staff Meteorologist at Applied Weather Associates (AWA). At AWA, she contributes to the meteorological facets of regional and site-specific probable maximum precipitation studies. Ms. McGlone earned her BS in meteorology from Valparaiso University, where she participated in convective field studies over the summer. She holds her MS in atmospheric science, with an emphasis in climatology, from the University at Albany, SUNY. During her education, she participated in a regional workshop on water resources and melting snow and glaciers in the Andes. She also spent a summer working with the rain rate and reflectivity factor in the Tropical Rainfall Measuring Mission (TRMM) Precipitation Radar. Prior to AWA, Ms. McGlone created a real time forecasting verification system and wind ramp classification database at Vaisala, Oyj.
