PROFESSIONAL EXPERIENCE

Applied Weather Associates, Monument, CO
Staff Meteorologist

April 2014-Current

- Meteorological analysis of extreme precipitation events for PMP studies.
- Data mining, sorting and quality control for past precipitation events.

GEI Consultants Inc., Denver, CO
Marketing Assistant

2011-2014

- Creates, edits and produces company marketing materials such as brochures, booklets, posters and Statements of Qualifications.
- Organizes, tracks and participates in multiple company tradeshow.
- Participates in the creation and production of proposals on a weekly basis, including upkeep of monthly calendar to keep track of crucial due dates.
- Organizes, tracks and orders marketing inventory and promotional items.
- Data entry weekly on Cosential database to update personnel resumes and records.
- Works daily on document editing, formatting and templates.

IPS MeteoStar. Inc., Englewood, CO

2007-2011

Project Analyst/Meteorological Software Documentation Manager 2010-2011

- Created and executed the project schedule and revised as appropriate to meet the changing needs and requirements of the project.
- Set up spreadsheets and ran labor reports to track project expenses to ensure expectations remain on course.

- Constantly monitored and presented reports to top management defining the project progress, problems and solutions.
- Wrote, reviewed and edited meteorological software user manuals for the company and also for multiple Aviation, Environmental and Military customers.
- Worked closely with leaders to determine and provide specific materials based on changes in the software.
- Developed a template to be used for all company manuals to ensure efficiency and consistency in reporting new changes.

Broadcast Meteorologist 2009-2010

- Compiled, wrote and recorded hourly commentaries on websites for regional, national, international and tropical weather.

Meteorological Software Test Engineer, 2007-2009

- Performed testing of LEADS® (Leading Environmental Analysis & Display System) software which ingests, integrates, processes, stores, and displays meteorological and environmental data.
- Worked directly with engineers to perform tests of each phase of the software development cycle including unit, acceptance and regression testing.
- Cooperated on Scrum teams to identify, track and document software deficiencies.
- Developed and executed detailed test plans coordinating with customer specific requirements.
- Quality assurance testing helped advance LEADS® into an operational environmental toolkit that still uses numerical models and multiple data feeds (Radar, Satellite, Water Quality sensors and others) to provide professional solutions.

Cattlehedging.com, Centennial, CO

2007

Student in Training Weather Forecaster

- Wrote and edited a 5-7 day forecast for livestock and grain producers.

Golf'n Gals Inc., Centennial, CO
